# Microsoft Code of Conduct

(영어 원문은 <https://mybuild.microsoft.com/code-of-conduct>에서 보실 수 있습니다. 아래 번역은 참고를 위해 공유합니다.)

Microsoft의 사명은 지구상에 있는 모든 사람과 조직이 더 많은 것을 달성할 수 있도록 권한을 부여하는 것입니다. 여기에는 디지털 플랫폼을 포함한 모든 Microsoft 이벤트 및 모임이 포함되며, 모든 참가자에게 존중받고 친근하며 재미있고 포괄적인 경험을 제공합니다.

우리는 모든 디지털 이벤트 참가자가 주요 디지털 이벤트 및 모든 관련 활동을 다루는 이 행동 강령의 원칙을 지킬 것으로 기대합니다. 당사는 장소에 관계없이 비즈니스 및 사회 활동을 포함한 프로그램의 모든 측면에서 어떤 형태로든 당사자 참가자의 파괴적이거나 무례한 행동, 메시지, 이미지 또는 상호 작용을 용납하지 않습니다.

Microsoft는 연령, 조상, 색상, 성 정체성 또는 표현, 출신 국가, 신체적 또는 정신적 장애, 종교, 성적 지향 또는 해당 지역 법률, 규정 및 조례에 의해 보호되는 기타 특성에 따른 괴롭힘이나 차별을 용납하지 않습니다.

우리는 모든 사람들이 환영하고 안전한 환경을 조성하는 데 도움을 줄 것을 권장합니다. 비즈니스 행동 핫라인(1-877-320-MSFT 또는 [buscond@microsoft.com](mailto:buscond@microsoft.com))에 우려사항, 괴롭힘 행위, 의심스러운 활동 또는 파괴적인 활동을 신고하십시오. Microsoft는 단독 재량에 따라 언제든지 Microsoft Build에서 어떤 사람을 입국하거나 제거할 권리를 보유합니다.

## Windows Subsystem for Linux

Near-native Linux performance with a real Linux kernel

Preview: Hardware accelerated workloads via GPU

WSL2 available today

[aka.ms/wsl](http://aka.ms/wsl)

A laptop screen displaying a slide from a Microsoft Build 2020 keynote. The slide is titled "PowerPoint Slide Show - Build 2020 ScottHa Keynote Deck.pptx - PowerPoint". The main content is a large title "Windows Subsystem for Linux" and a subtitle "Near-native Linux performance with a real Linux kernel". Below that is a section "Preview: Hardware accelerated workloads via GPU" and "WSL2 available today". At the bottom is a link "[aka.ms/wsl](http://aka.ms/wsl)". To the right of the slide, there are three terminal windows showing Linux command-line interfaces. The top window is for "Debian", the middle for "openSUSE", and the bottom for "Ubuntu". Each window displays system information like OS, Kernel, Uptime, Packages, Shell, Disk, CPU, and RAM. The backgrounds of these windows show a blue sky with clouds. The overall image is a composite of a video feed and a presentation slide.

# The Age of Developers

A photograph showing musicians in an orchestra. In the foreground, a person with long dark hair is seen from behind, wearing a red shirt and playing a violin. To their right, another person with blonde hair is also playing a violin. In the background, a man in a blue shirt is playing a cello. A music stand with sheet music is visible between them. The lighting is warm and focused on the musicians.

## Azure SQL DB Hyperscale

[Learn more about Hyperscale](#)

Start small and reach unlimited scale with your apps deployed on Hyperscale, new service tier architected for cloud

### Key capabilities

- Scale compute and storage separately
- Scalable tiered storage architecture (100TB + Infinite Log)
- Rapid scale up
- Rapid scale out (support 4 read replicas)
- Restore in constant time
- Accelerated database recovery
- No impact of backups and checkpoints on compute

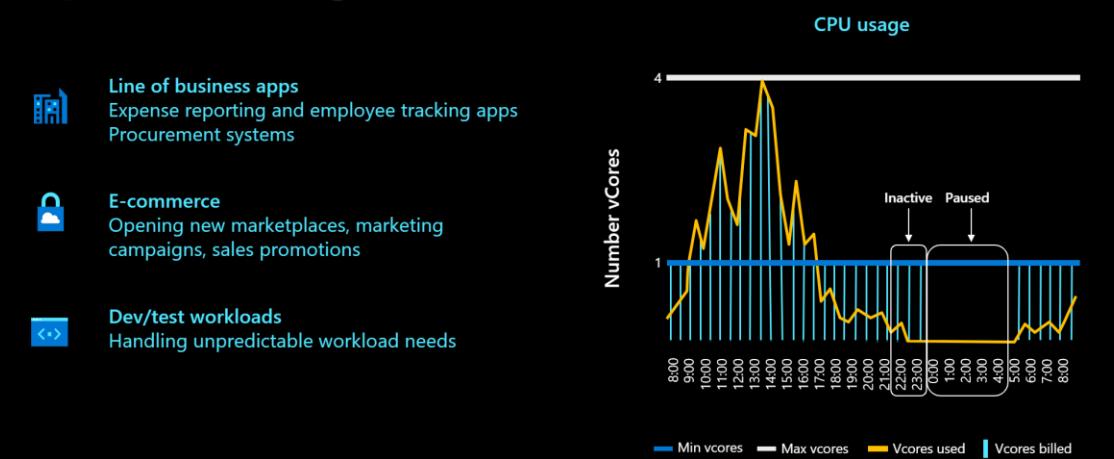

## Challenges with sporadic or unpredictable usage

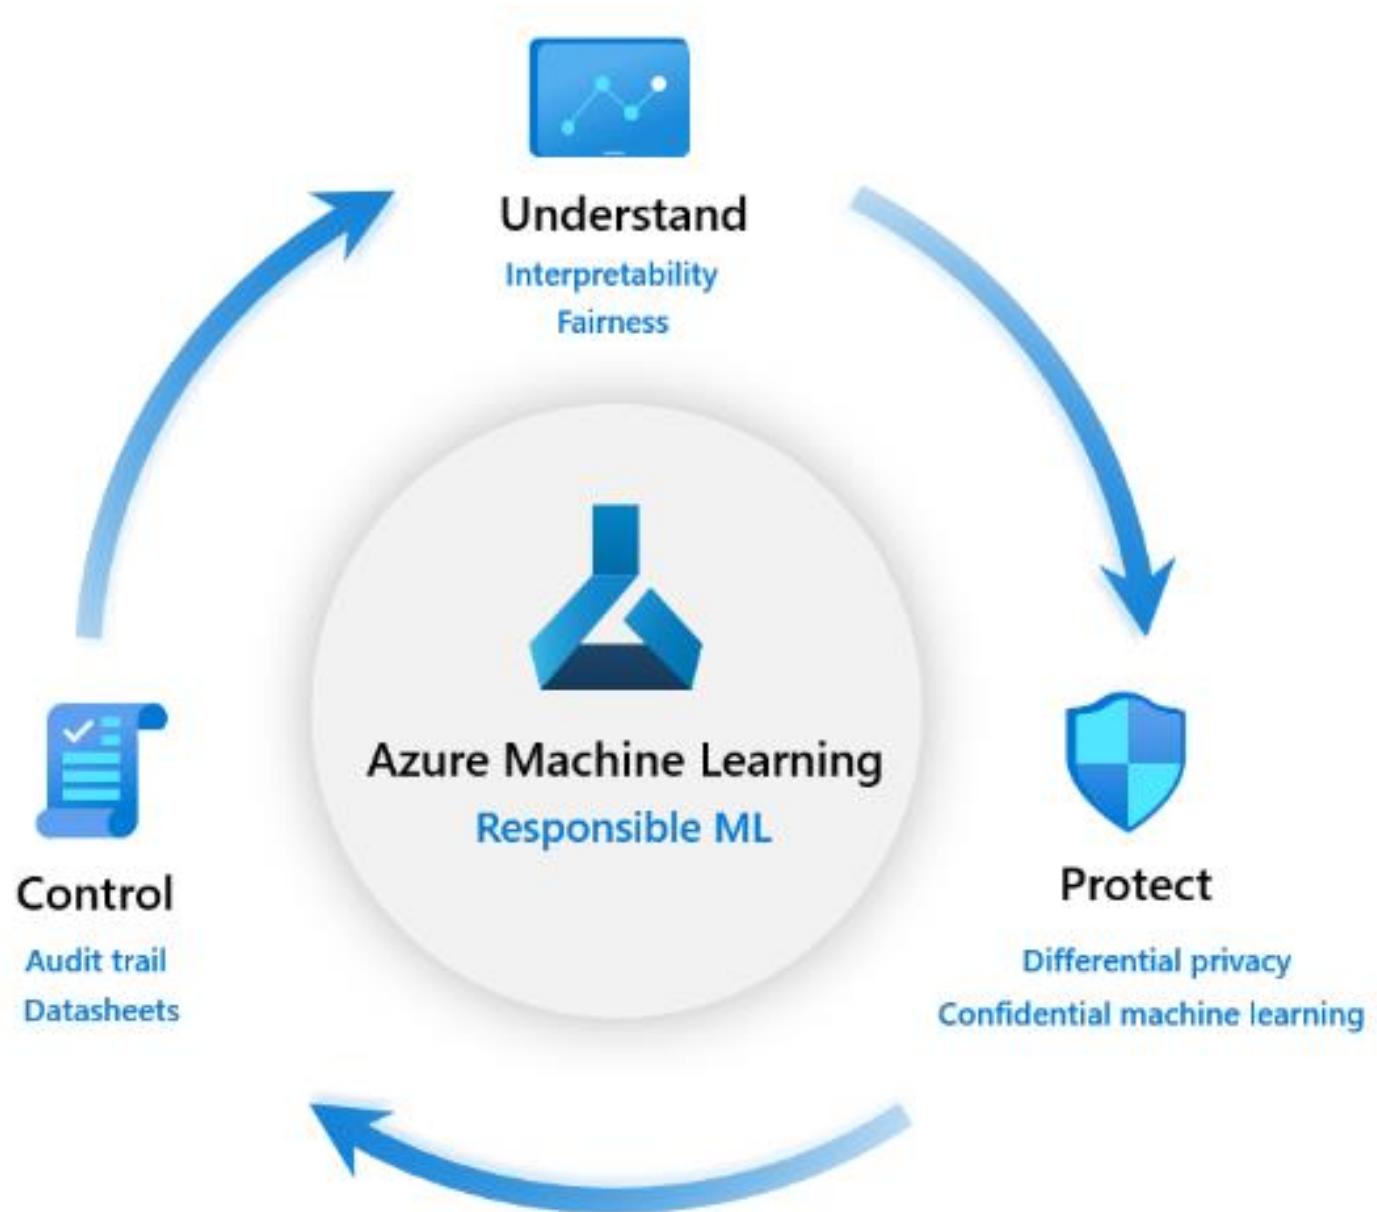

**Line of business apps**  
Expense reporting and employee tracking apps  
Procurement systems

**E-commerce**  
Opening new marketplaces, marketing campaigns, sales promotions

**Dev/test workloads**  
Handling unpredictable workload needs

## Azure SQL Database Serverless

*Power Virtual Agents seamlessly integrates with Bot Framework Composer built dialogs enabling bot developers to collaborate with subject matter experts **without needing to host any new infrastructure***

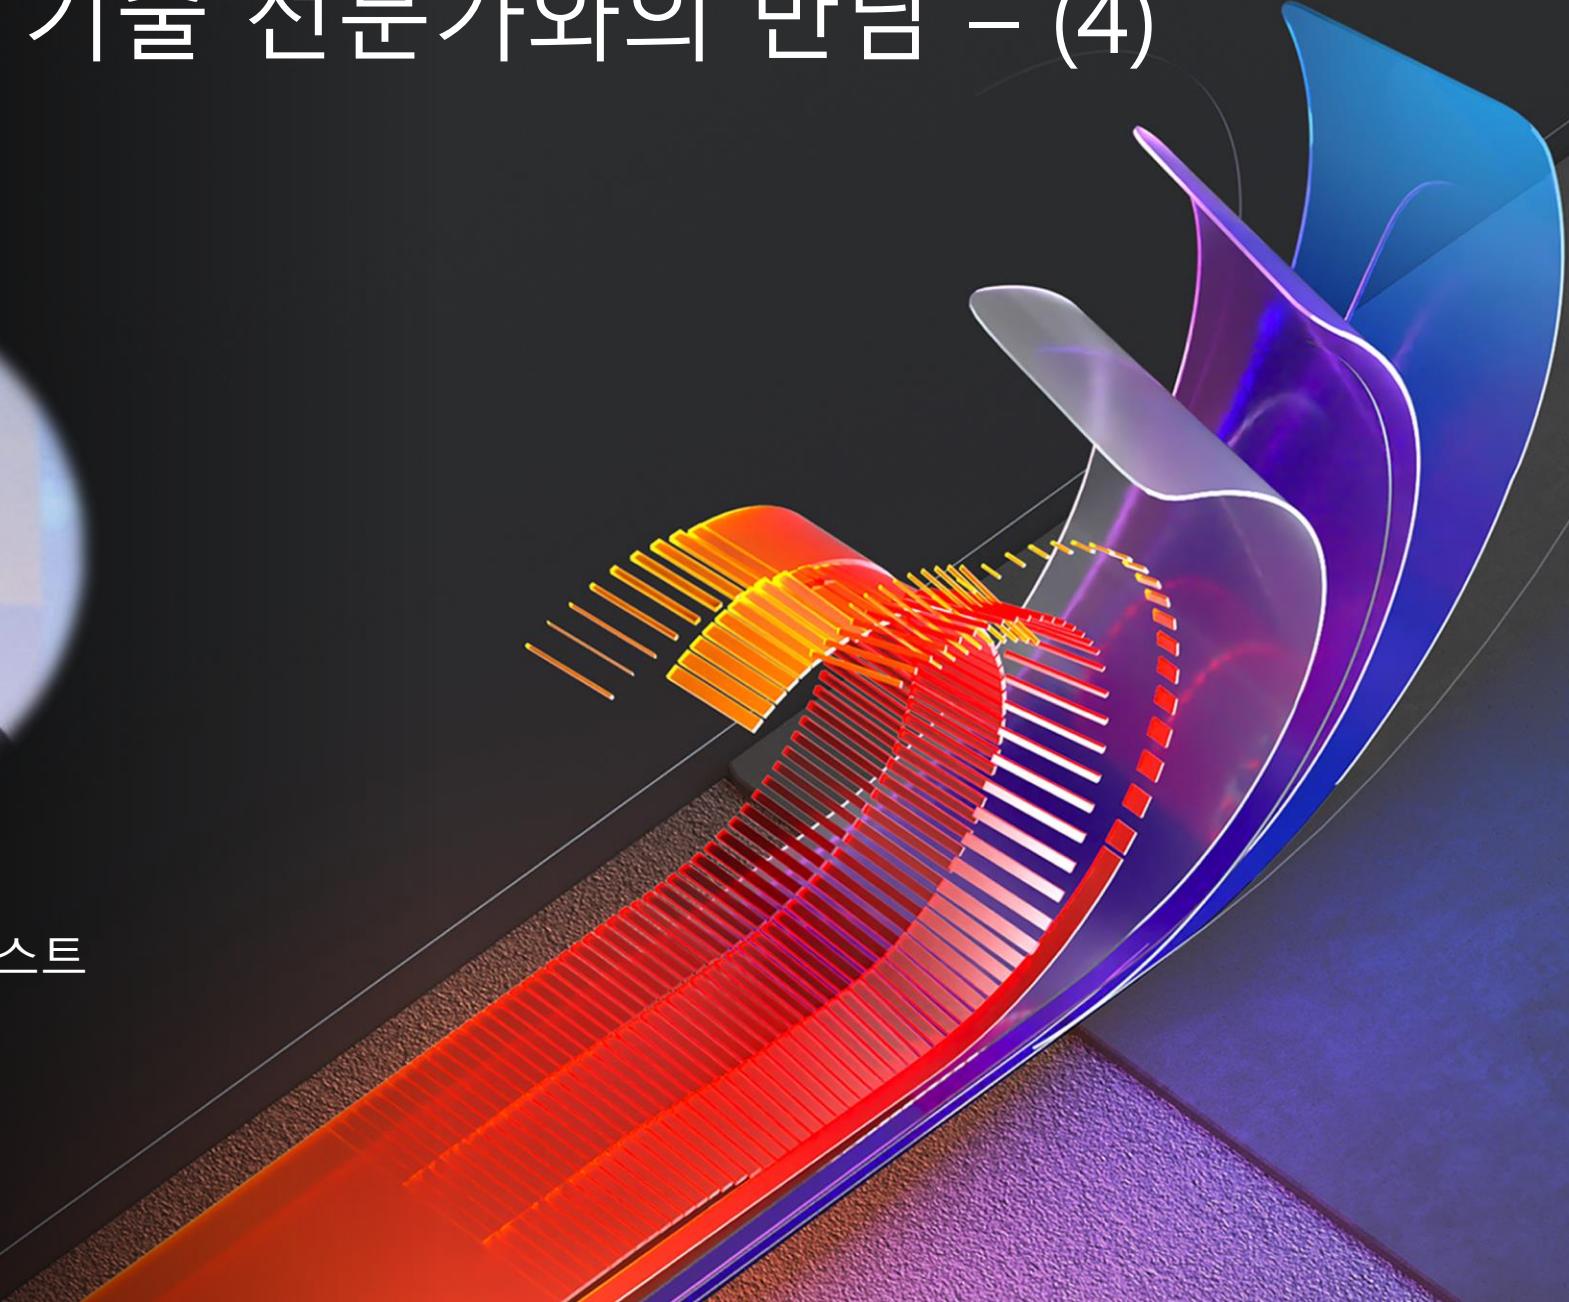

The screenshot shows the Power Virtual Agents interface. At the top, there's a teal circular icon with a white computer monitor and microphone. Below it, the text "Power Virtual Agents" and "Bots. Made. Easy". Underneath, it says "Part of the Power Platform Family" with icons for Power BI, Power Apps, Power Automate, and Power Virtual Agents. The main area has a title "Power Virtual Agents | build-demo" and a sidebar with options like Home, Topics, Entities, Analytics, Publish, Manage, Channels, Authentication, Skills, and Composer topics. The main pane shows a "Test bot" section with a "Chat" tab open. It displays a conversation with "Alex Wilber" (Marketing Assistant, Marketing) and a message from "I've checked both of your calendars, here are some options:". Below this is an "Action" block with the text "Add this topic to your dialog to s...". At the bottom, there's an "End" block and a note "End of Conversation". A "Search topic" bar at the top of the main pane allows searching for "Trigger Phrases (5)".

The screenshot shows the Bot Framework Composer interface. At the top, there's a blue circular icon with a white cube. Below it, the text "Bot Framework Composer" and "Visual authoring canvas for developers". The main area has a title "Bot Framework Composer | whoskill (en-us)". On the left is a sidebar with a tree view of available actions: Filter Dialog, whoskill, ExtractKeyword, GetDirectReports, GetEmailContacts, GetEventContacts, GetManager, GetPeers, ProcessSearchKeywordResult, SearchForFinalResult, SearchPerson, BeginDialog, SendPage, ShowItem, ShowList, ShowNext, ShowPrevious. The main pane shows a complex dialog flow starting with "BeginDialog" (condition: expression > 13, priority: 15, run once: false). This leads to an "OAuth login" action using "msGraph". Then it branches: if "userToken" is null, it goes to "SendPage" with a URL to get user info from "graph.microsoft.com". If "userToken" is not null, it goes to "Set a property" to update "dialog.url" and then to "Send an HTTP request" using "GET \$dialog.url". Finally, it branches again based on "conversation.keyword" (if not null, it goes to "Set a property" to update "dialog.url" and then to "Send an HTTP request" using "GET \$dialog.url").

A man in a checkered shirt and glasses is standing on a stage, pointing towards a large projection screen. The screen displays a complex flowchart of a DevOps pipeline. The diagram starts with a developer pushing code from Visual Studio or Visual Studio Code into Azure Repos (Git). This triggers a build process in the Azure Build Pipeline, which then publishes artifacts to Azure Artifacts. These artifacts trigger a release process in the Azure Release Pipeline. The release pipeline flows through three stages: Dev Stage (Deploy to Dev), QA Stage (Deploy to QA), and Prod Stage (Deploy to Staging Slot, followed by Swap Staging and Prod Slots). Each stage includes steps like Get Source, Install Tools, Build Solution, Run Tests, Package Artifacts, and Publish Artifacts. The final stage leads to a Production Slot. The background of the slide features the word '시연' (Presentation) in large blue letters, and there are decorative elements like a speech bubble saying '2회 세미나' (2nd Seminar) and various icons related to development and deployment.
